The unique power handle design + easy switch & lock attachment system means changing your hairstyle is as easy as changing your outfit. Plus, it's perfect for second day hair that just needs a touch-up or some extra bounce.

Many aspects of modern living, including air conditioning, contact with man-made fibers & air pollution add to the build-up of static

SAVE THESE INSTRUCTIONS

electricity in your hair. Even simply brushing & towel-drying your hair can increase these levels. This static charge causes the scales, or cuticles of the hair, to push hair strands apart, resulting in a rough hair surface. Consequently, your hair may have a dull appearance. High levels of static charge cause your hair to become 'flyaway' & difficult to style.

The advanced super anti-frizz technology releases 60% more ions* to eliminate static, conditioning the hair cuticle for ultimate frizz-free smoothness & enhanced shine.

* Than a VS Sassoon hot air styler with standard ionic. Results may vary depending on environmental factors, hair texture and condition.

CERAMIC TECHNOLOGY

Ceramic Technology helps keep your hair looking healthy & shiny by maintaining even heat during the drying & styling process. Static is reduced by guickly sealing the hair cuticle layer ensuring minimal frizz making your hair easier to manage.

IMPORTANT

Hair that has been heavily bleached or chemically treated should only use the low heat setting on this product. Please consult your Once air-styled, finally finger comb to arrange your hair as hairdresser on using heated appliances if you have any concerns about the condition of your hair.

Take care not to direct the airflow directly onto the skin (e.g. scalp neck ears, face, etc.) as hot air from the styler can, particularly if held too close, cause discomfort or even burn.
