### WARNING

#### RADIO WAVES

Observe all signs and instructions that require an electrical device or radio product to be switched off in designated areas, such as gas/refueling stations, hospitals, blasting areas, potentially explosive atmospheres or aircraft.

#### MAGNETS AND DEVICES

This product has magnets which may interfere with pacemakers, defibrillators and programmable shunt valves or other medical devices. Do not place this product close to such medical devices or persons who use such medical devices. Consult your doctor before using this product if you use such medical devices.

#### VOLUME LEVEL

Permanent hearing loss may occur if the product is used at high volume. Set the volume to a safe level. Over time, increasingly loud audio may start to sound normal but can actually be damaging your hearing.

If you experience ringing or any discomfort in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the sooner your hearing could be affected. To protect your hearing:

- Limit the amount of time you use the product at high volume.
- Avoid raising the volume to block out noisy surroundings.
- Lower the volume if you can’t hear people speaking near you.

#### LITHIUM-ION BATTERY

Do not handle damaged or leaking lithium-ion batteries. If the material comes into contact with the skin, eyes or clothes, immediately rinse the affected area with clean water and consult your doctor. The battery used in this device may present a risk of fire or chemical burn if mistreated. Do not leave the battery charging for a prolonged period of time when the product is not in use.

#### YOUNG CHILDREN INJURIES

CHOKING HAZARD – Small parts. Keep the product and accessories out of the reach of young children. Young children may swallow small parts or may wrap the cable around themselves, which may inflict injury.

#### DISCOMFORT TO YOUR SKIN

If you feel that the product is irritating your skin, stop using it immediately.

#### NEVER DISASSEMBLE OR MODIFY THE PRODUCT OR ACCESSORIES

There is a risk of fire, electric shock, or injury.

### Precautions

#### Taking breaks

If you experience discomfort while using the product, stop using it immediately. If the condition persists, consult a doctor.

#### Static shock

When using the product in particularly dry air conditions, you may sometimes experience a small and quick (static) shock on your ears. This is a result of static electricity accumulated in the body, and is not a malfunction of the product.
