## SPECIAL CORD SET INSTRUCTIONS

A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.

Longer extension cords are available and may be used if care is exercised in their use.

If a long extension cord is used, the marked electrical rating of the extension cord must be at least as great as the electrical rating of the appliance, and the longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over.

## OPERATING NOTICE

Clogging and backing up of water and/or coffee in the filter basket can occur under any or a combination of any of the following conditions: The use of too finely ground coffee, using two or more paper filters, using the gold tone filter in conjunction with a paper filter or not properly cleaning coffee grounds from the gold tone filter, or allowing coffee grounds to spill over the filter.

**Caution:** Never open the reservoir cover during the brewing cycle, even if no water is draining from the filter basket, since extremely hot water/coffee can spill out from the basket and cause injury. If water/coffee is not draining from the filter basket during the brewing cycle, unplug the unit and wait 10 minutes before opening the reservoir cover and checking the basket.

# INTRODUCTION

Congratulations on the purchase of your new Cuisinart® Classic Thermal 10-Cup Programmable Coffeemaker! Please take a few moments to discover the features of your new coffeemaker, including the double-wall thermal carafe, and the programmable brew functions. Classic Cuisinart style means you'll enjoy every cup for years to come.

## THE QUEST FOR THE PERFECT CUP OF COFFEE

### ELEMENT 1: WATER

Coffee is 98% water. The quality of that water is as important as the quality of your coffee. If water doesn't taste good from the tap, it won't taste good in your coffee. Cuisinart includes a charcoal water filter to remove chlorine, bad tastes and odors, for the purest coffee flavor, every time you brew.

### ELEMENT 2: COFFEE

While coffee is 98% water, all of the flavor comes from the beans. To achieve the same great taste you enjoy at a coffee bar, you need to use the same quality of coffee. If you choose to grind your own beans, buy them fresh and whole. Buy only about a two-week supply at a time, because once the bean is broken, its flavor degrades quickly.

### ELEMENT 3: GRIND

The grind is critical for proper flavor extraction. If the grind is too fine, over-extraction and bitterness will result. Too fine a grind may also clog the filter. If grind is too coarse, the water will pass through too quickly and the maximum flavor will not be extracted. When grinding your own beans, we recommend a medium-fine grind.

### ELEMENT 4: PROPORTION

Coffee that is too strong or too weak is always a disappointment. Follow the recommended portions of ground coffee in the instructions under Brewing Coffee, and later adjust the amount to suit your taste.

## PROGRAMMING YOUR COFFEEMAKER FOR DELAYED BREW TIME

### To set the time:

1. Turn the function knob to “Clock.”
  - a. **Set Hour:** Press and hold the Hour button to scroll through numbers quickly. When number displayed approaches the desired setting, press and release (pulse) the button to advance one digit at a time. After setting the correct hour, the default will be the last time set unless power is shut off.

**NOTE:** When the number count passes 12, the PM light will be displayed on the LCD.

- b. **Set Minutes:** Press and hold the Minute button to scroll through numbers quickly. When number displayed approaches the desired setting, press and release (pulse) the button to advance one digit at a time. After setting the correct minute, the default will be the last time set unless power is shut off. To finish setting time, turn the Function Knob to any other setting or simply wait until the numbers stop blinking.

## To program the Auto On (brew start time)

1. Turn the function knob to “Prog.”
2. Set the time you want coffee to begin brewing by using the minute and hour push-buttons. Follow the same instructions you used to set the time of day, in the **To set the time** section above.
3. Turn the function knob to “Auto On.” LCD will display the current time.
4. Press the On/Off button and release. The green indicator light will come on to remind you that the programming function is in use. At the programmed time, the red indicator will come on as well, indicating that the brew cycle is starting. Both lights will go off when keep warm cycle ends.

## 1 - 4 Cup Setting

The 1- 4 cup setting button is used when you make small amounts of coffee. The 1-4 cup setting basically double heats the water, making your smaller amount piping hot.

**To use:** When making a smaller amount, press the 1-4 button on the control panel after turning on the unit.

## Power Loss Back-up

One-minute protection in case a breaker trips, the unit is unplugged, or the power fails. It holds all programmed information, including time of day, auto on time and auto off time.

## CHARCOAL WATER FILTER

Your Coffeemaker comes with a charcoal water filter that eliminates chlorine, bad tastes and odors from tap water.

### Inserting the Water Filter

- Remove the filter from the polybag and soak it, fully immersed, in cold tap water for 15 minutes.
- Lift the water filter holder out of the water reservoir (see diagram, page 5).
- Press down on the filter compartment and pull toward you to open.
- Place filter into the holder and snap it closed. Be careful – improper placement can tear the filter skin.
- Flush filter by running cold tap water through holes in bottom of compartment for 10 seconds.
- Allow the filter to drain completely.
- Slide the water filter holder back into the channel in the water reservoir, pushing it down to the base of the unit.

**NOTE:** We recommend changing the water filter every 60 days or after 60 uses, and more often if you have hard water.

Replacement filters can be purchased in stores, by calling Cuisinart Customer Service, or at [www.cuisinart.com](http://www.cuisinart.com).

## BREWING COFFEE

**Follow instructions in Before First Use on previous page.**

### 1. Insert charcoal water filter

Follow directions for the preparation and insertion of the filter on page 8.

### 2. Fill the water reservoir

Open the Coffeemaker reservoir cover by lifting it up. Pour in the desired amount of water using the water level indicator located at the side of the coffeemaker.

### 3. Cup preference

Push the 1–4 cup button if you are brewing fewer than 5 cups.

### 4. Add the ground coffee

Remove the filter basket by grasping the handle and lifting straight up. Insert a #4 paper filter **OR** permanent filter. Be sure that a paper filter is completely open and fully inserted in the basket. It may help to fold and flatten the seams of a paper filter beforehand. Add 1 level scoop of ground coffee per cup. Adjust the amount according to taste.

**NOTE:** The maximum capacity for ground coffee is 15 tablespoons for this coffeemaker. Exceeding this amount may cause overflow if the coffee is too finely ground.

Replace the filter basket in the filter basket holder and press firmly on cover to be sure it closes securely.

### 5. Before brewing coffee

Make sure the glass carafe is in position on the heater plate and the top cover is closed. Plug the cord into an electrical outlet.

### 6. Power unit

Turn the Function knob to BREW, press the On/Off button, and the blue indicator light will turn on. Or, set the AUTO ON function (see page 7) and the Auto On indicator will light.

### 7. After brewing is complete

When the brewing cycle has been completed, five beeps will sound. Coffee will continue to stream from the filter for several seconds.

---

**NOTE: Reservoir cover may be hot during and directly after brewing. Wait at least 10 minutes before opening.**

## CLEANING AND MAINTENANCE

Always turn coffeemaker OFF and remove the plug from the electrical outlet before cleaning.

Lift up the reservoir cover. Remove and discard the paper filter and ground coffee. The filter basket and permanent filter can be washed in warm, soapy water and rinsed thoroughly, or cleaned in the upper rack of the dishwasher.

Dry all parts after use.

**Do not put any water in the unit once the filter basket has been removed. Wipe the area under the filter basket with a damp cloth.**

Remove the carafe from the resting plate.

Discard any remaining coffee. The carafe and lid can be washed in warm, soapy water and rinsed thoroughly, or placed in a dishwasher.

The carafe and carafe lid should be placed on the upper rack only.

Do not use any scouring agents or harsh cleansers on any part of the coffeemaker.

Never immerse base unit in water or other liquid. To clean base, simply wipe with a clean, damp cloth and dry before storing.

Fingerprints and other blemishes on the stainless steel housing can be washed off with soap and water or a nonabrasive cleaning solution. Wipe resting plate with a clean, damp cloth. Never use rough, abrasive materials or cleansers to clean the resting plate. Do not dry the inside of the water reservoir with a cloth, as lint may remain.

## MAINTENANCE

Any other servicing should be performed by an authorized service representative.

## DECALCIFICATION

Decalcification refers to the removal of calcium deposits that form over time on the metal parts of the coffeemaker.

### To Decalcify Your Coffeemaker

For best performance from your Coffeemaker, decalcify the unit from time to time. The frequency depends upon the hardness of your tap water and how often you use the Coffeemaker. The flashing Clean light will indicate when unit should be cleaned. If the Clean light begins to flash when the Coffeemaker is turned on, it is telling you that the calcium buildup is interfering with the functioning of your Coffeemaker and the flavor of your coffee. To clean, fill the water reservoir to capacity with a mixture of  $\frac{1}{3}$  white vinegar and  $\frac{2}{3}$  water. Press the Clean button. When the Clean light glows, turn the Coffeemaker on by pressing the On/Off button. The Clean light will shine steadily. The Coffeemaker is now in CLEAN mode. One cycle should be sufficient to adequately clean the Coffeemaker. When the cycle is completed and the five beeps sound, the Coffeemaker will shut off. Turn the Coffeemaker on to see if the Clean light continues to flash. If it does, turn it off and then repeat the cleaning procedure with a fresh solution of vinegar and water.

If the Clean light no longer flashes, turn the Coffeemaker off and then run one cycle of fresh cold water through the unit before using the unit again to brew coffee.

### Notes on the CLEAN Function

Pressing the Clean button cancels all other settings. If it is pressed accidentally, press it again to return the Coffeemaker to all its previous settings. Pressing On/Off will also exit the CLEAN mode and turn the Coffeemaker off.

前言

恭喜您購買Cuisinart®半自動10杯經典美式咖啡機！請花幾分鐘時間來瞭解新咖啡機的功能，包括雙層保溫咖啡壺和可設定沖泡功能。Cuisinart讓您可以盡情享受每一杯咖啡。

製作完美咖啡的要素

要素1：水

咖啡含有98%的水。水的品質與咖啡的品質同樣重要。如果水的味道不好，咖啡的味道也不會好。Cuisinart內置木炭濾水器，可去除氯、不好的味道和氣味，讓您時刻沖泡最純的咖啡。

要素2：咖啡

雖然咖啡含有98%的水，但所有香味均來自咖啡豆。要想獲得您在咖啡吧享受的同樣美味，您需要使用同樣品質的咖啡。如果您自己研磨咖啡豆，應購買新鮮的整粒咖啡豆。每次約購買兩周的用量，因為一旦咖啡豆壞了，味道就會迅速下降。

要素3：研磨

研磨是獲得美味的關鍵。過細會導致過度萃取，出現苦味。過細還可能會堵塞過濾器。過粗，會導致水過快流過，無法萃取最佳味道。自己研磨咖啡豆時，建議研磨成中等細度。

要素4：比例

咖啡味道太濃或太淡都不會呈現最佳味道。請按照沖泡咖啡的說明選擇研磨咖啡的比例，此後，可根據自己的口味調整。

## 特殊電線元件說明

短電源線可防止纏結或有人被絆倒。

配備長電源線，請小心使用。

使用長電源線時，長電源線的額定功率至少須與電器相同，應安置好電源線，切勿讓其從檯面或桌面垂下，防止被兒童牽拉或有人被絆倒。

## 使用注意事項

發生以下任何一種情況或多種情況時，過濾網中的水和/或咖啡會堵塞和回流：使用太精細的研磨咖啡，使用兩張或多張濾紙，同時使用金屬過濾網和濾紙，或未適當清洗金屬過濾網的咖啡渣，或咖啡渣溢出過濾器。

**注意：**切勿在沖泡期間打開蓋子，若水沒有從過濾網排出，極熱的水/咖啡可能會從網中溢出並燙傷您。如果在沖泡期間，水/咖啡未從過濾網排出，拔下電源線，等待10分鐘，再打開蓋子，並檢查過濾網。

## 重要開箱說明

3. 打開盒子，咖啡機的背面向下，從盒子滑出咖啡機。
